J&J Healthcare Institute, Inc.

Aims to provide hands on training to our students, and to provide skilled workers to communities of interest, who are ready to engage in careers that are in high demand. We aim to improve employability and inspire life long career growth, thereby improving the quality of life of individuals in our community.

Medical Assistant

The duties of Medical Assistants vary from office to office, depending on the location and size of the practice and the practitioner's specialty. In small practices Medical Assistant usually do many different kinds of tasks, handling both a administrative and clinical duties and reporting directly to an office manager, Physician, or other health practitioners. Those in large practices tend to specialize on a particular area under the supervision of department administrators.

Phlebotomy

The Phlebotomy Technician program is designed to train students to perform duties which include blood draw, storing blood and blood components, veni-puncture, and basic processing. Students will learn the circulatory system and its functions and pathology of diseases, law and ethics, critical policies and procedures including universal precautions, infection control, OSHA and CLIA guidelines and how they apply to the Phlebotomy Technician's duties and responsibilities. Students will demonstrate knowledge and apply skills in using medical tools and equipment relevant to the function of a Phlebotomy Technician.

Electrocardiograph Technician

Students will learn the cardiovascular system and its functions and pathology of diseases, law and ethics relative to the electrocardiograph technician and duty function in the medical chain of command. Students will demonstrate knowledge and apply skills in using medical instrumentation modalities relevant to the function of an electrocardiograph technician.

Patient Care Technician

The Patient Care Technician program is designed to train students in all of the relevant aspects of patient care, including personal care, physical comfort, diagnostic testing specifically electrocardiography, phlebotomy, home health care needs, providing post operative care, geriatric care and other critical functions. Graduates of this program will be prepared to work at the entry level in hospitals, home health agencies, clinics, laboratories and other healthcare settings.

Nursing Assistant

The Nursing Assistant program is designed to train students in all of the relevant aspects of long term patient care under the supervision of a Registered Nurse. Completion of this program prepares them to sit for Certification as a Nursing Assistant.

Pharmacy Technician

This course is designed to provide the knowledge and hands on experiences required to successfully execute the duties, the roles and responsibilities of the Pharmacy Technician. Students will develop the knowledge needed to understand basic dosage orders, as well as measure and record calculations for such dosages. Students will learn to identify drugs, including a variety of popular drug names and their uses. Students will use pharmaceutical medical terminology, and define the major symbols and abbreviations used on prescriptions and state the meaning.
